PROFESSIONAL SUMMARY

Results-driven **Python Developer** and **Data Scientist** with expertise in building scalable web applications, predictive machine learning models, and interactive data visualization systems. Skilled in Python, Django, MySQL, and core data science libraries including Pandas, NumPy, and Scikit-learn. Demonstrated ability in transforming complex environmental and web datasets into actionable solutions. Adept at software engineering fundamentals, frontend design, and machine learning pipeline development.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, HTML5, CSS3
- **Frameworks & Libraries:** Django, Pandas, NumPy, Scikit-learn, Bootstrap, Tkinter
- **Database Management:** MySQL
- **Data Science & Analytics:** Exploratory Data Analysis (EDA), Regression Modeling, Data Visualization (Matplotlib, Seaborn)
- **Developer Tools:** Git, GitHub Pages, Jupyter Notebook, VS Code
- **Core Competencies:** Problem Solving, Data Preprocessing, Web Development, Algorithm Design

PROJECTS

Air Quality Prediction System | *Python, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn*

- Engineered an end-to-end machine learning solution to predict ambient air quality and pollutant concentrations using environmental datasets.
- Designed data preprocessing, feature engineering, and cleaning pipelines to optimize regression model efficiency.
- Implemented regression algorithms to evaluate parameters such as temperature, humidity, and AQI indices.
- Constructed analytical dashboards using Matplotlib and Seaborn to visualize pollutant trends for environmental decision-making.

Responsive Personal Portfolio | *HTML5, CSS3, JavaScript, Bootstrap, GitHub Pages*

- Developed a responsive web application to showcase software engineering projects, technical skill sets, and certifications.
- Integrated interactive user interface components with Bootstrap to ensure seamless cross-device compatibility and usability.
- Deployed the live build using GitHub Pages for performance optimization and continuous accessibility.

Secure Password Generator Application | *Python, Tkinter*

- Built a customizable graphical user interface (GUI) desktop application for generating cryptographic-grade passwords.

- Implemented randomized algorithms allowing user-defined parameter controls (length, special characters, numeric complexity).

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering[cite: 6]

Einstein Academy of Technology and Management, Bhubaneswar, Odisha (2021 – 2025)[cite: 6]

Cumulative Performance: SGPA: 8.09 / 10.0[cite: 6]

Higher Secondary Education (Class XII - Science)[cite: 6]

Gyan Bharati Institute of Science and Technology, Bhubaneswar, Odisha (2019 – 2021)[cite: 6]

Score: 72%[cite: 6]

Secondary Education (Class X)[cite: 6]

Sri Aurobindo Integral Education Centre Matrubihar, Kalupadaghat (2019)[cite: 6]

Score: 71%[cite: 6]

CERTIFICATIONS

- Python Programming Certification – CODSOFT[cite: 6]
- Python Specialist Certification – CAC, Bhubaneswar[cite: 6]
- Web Development Certification – BHARAT INTERN[cite: 6]
- Corporate Communication & Soft Skills – TCS iON[cite: 6]

PROFESSIONAL DEVELOPMENT & SEMINARS

- Generative AI Workshop – NXTWAVE[cite: 6]
- Data Science Career & Analytics Webinar – DV Analytics[cite: 6]
- Big Data Technology Seminar – Einstein Academy of Technology and Management[cite: 6]
